5. Money. Read the text carefully.

Thousands of years ago, people didn't use coins or paper money. If they wanted to buy something, they paid for it with animals, jewelry, crafts or food. In early Rome, the army paid their soldiers with salt, because it was difficult to get and therefore it was very valuable. In fact, the English word *salary* comes from the Latin word for salt.

When copper was found on Cyprus, an island in the Mediterranean Sea, traders began to use it to pay for products. Countries then made coins from copper and other valuable materials, and the idea of money was born.

Today, most people use paper money or coins when they want to buy something. However, taxes and the cost of living are getting higher and higher every day and people can't buy much with their money. As in the past, some people are now starting to pay with products or work instead of money. For example, a farmer might pay an electrician with vegetables or a woman may paint apartments in her building to pay her rent.

Historians often say that history repeats itself. Maybe it really does. You may be able to pay for future English classes with six kilos of tomatoes or a sweater for your teacher!
